Quartz Kitchen Sink

INSTALLATION OF THE SINK PREPARING A NEW COUTERTOP

Trace the sink outline on the countertop (do not cut along this line).

Draw a line 1 cm inside the sink outline.

Measure the cut-out line you just drew and compare to all dimensions (double check)

Using a 2" hole saw, Drill a pilot hole inside the cutting line.

Using a jigsaw, cut along the inside line to cut the opening in the countertop.

With sink in the upside down position, place a continuous and generous bead of silicone sealant around the entire perimeter of the rim. This serves as a watertight seal.

Lift sink, turn face up and lower into the countertop cutout opening. Wipe excess sealant from perimeter with a wet cloth

DRILLING TAP HOLE
Invert the Sink, Use the marking to Drill the Hole with Wood Cutting Bit

Easy to Clean
